

# HOW SAFETY SHOES CAN PROTECT YOU?

Personal Protective Equipment (PPE) is essential for workers with jobs that involve heavy apparatus, chemical fluids, inclement environment and fire hazards. According to Occupational Safety and Health Administration (OSHA), PPE is an equipment worn to minimize exposure to hazards that cause serious workplace injuries and illnesses. And one of the PPE's that one often has overlooked is safety footwear. Thus, below is a list of circumstances on how safety footwear can safeguard your feet from any unfortunate incidents:

## CHEMICAL EXPOSURE

(ALL RHINO SHOE MODEL)

Chemicals such as acids, solvents, vapors, fumes and flammable materials can cause a serious reaction when they come into contact with skin. Choosing a correct safety footwear with excellent resistance over common chemicals is crucial in keeping these substances out from your shoes.

## METAL FILLINGS

(ALL RHINO SHOE EXCEPT PU-3100, C-101, C-102, C-201)

If your job is to deal with glass, concrete, rocks, metal and any sharp objects, it is advisable for you to pick a safety footwear with a steel toe cap and steel midsole for penetration resistance in against cuts and piercing from any sharp objects.

## TEMPERATURE FLUCTUATIONS

(RHINO SHOE CLASSIC & CLASSIC + SERIES)

Jobs like mining and manufacturing sometimes can cause a serious burn if did not manage carefully due to high temperatures. An ideal safety footwear with outstanding heat resistance, excellent sweat absorption and steel toe cap would be the most suitable pick for this situation.

## LETHARGY

(RHINO SHOE TPU-SERIES)

There are jobs that require workers to stand for long hours that often led to fatigue and unproductive. To encounter this problem, it is imperative to wear a comfortable safety footwear with extra wide-fitting toe cap and outsole designed to offer extra comfort while maintaining the durability.

## SLIPPERY FLOORS

(ALL RHINO SHOE MODEL)

Apart from temperature fluctuations, wet condition with slippery floors might cause a serious injury to workers for instance severe sprains and fractures due to slips and falls. A safety footwear with slip resistance design outsole to withstand unpleasant weather and offers outstanding slip resistance is a correct pick for this particular situation.

All in all, employers should play a vital role to urge and provide workers not only with a secure workplace but proper protective garments in avoidance of any severe incidents. At Safetyware Group, we believe that safety is everyone's responsibility, of which in line with our interest in producing the best of PPE equipment for all industry users.
