

PRODUCT SPECIFICATION

SAFETYWARE Navy Blue Fire Gloves

- Used for hand and wrist protection during firefighter training and fire extinguishing.
- Designed to protect against high temperatures, making them ideal for handling hot materials and working in extreme heat environments.
- Provides excellent insulation, ensuring hands remain warm and protected in cold conditions.
- Waterproof to keep hands dry and comfortable, even in wet environments.
- Constructed from high-quality, fire-resistant materials that offer superior protection and longevity.
- Ergonomically designed for a snug and comfortable fit, reducing hand fatigue during prolonged use.

APPLICATIONS

- Firefighting
- Industrial Work
- Rescue Operations
- Emergency Response Teams

TECHNICAL DATA

MATERIAL	Aramid
COLOUR	Navy Blue
SIZE	XL
CUFF PROFILE	Straight
FLAME EXTINGUISHNG TIME	Continued burning time < 2s, extinguishing time < 2s
ABRASION RESISTANCE	≥ 2000 times
TEAR RESISTANCE	≥ 4.0 N
TENSILE STRENGTH	≥ 50 N
PUNCTURE RESISTANCE	≥ 60 N
DEXTERITY	Able to pick up a steel pin twice within 30 seconds
THERMAL RESISTANCE	When heated to 180°C for 5 minutes, the surface temperature should not exceed 45°C, and shrinkage should be ≤ 5%
OVERALL THERMAL PROTECTION PERFORMANCE (TPP)	36.9(cal/cm ²)
STANDARDS	XF7-2004
PACKAGING	50 pairs / carton

Item Code: FFA-G-NBL

USAGE AND MAINTENANCE

- Do not use washing powder, detergent, or other non-specialized cleaning agents to clean the gloves.
- Firefighter gloves should be used with other personal protective equipment
- Regular inspection and maintenance:
 - Check the gloves after each use for wear and tear, dirt, and damage.
 - If the gloves are damaged, they should be replaced immediately.
 - If the gloves are dirty, clean them immediately to prevent damage.
