

HAND PROTECTION

SAFETYWARE High Heat Resistant Gloves

FEATURES

- SAFETYWARE High Heat Resistant Gloves are specially made to withstand the harshest working environment and provide superb high heat & mechanical protections which include abrasion, cut, and snag
- We understand that all of our customers' applications are unique, and that's why our High Heat Resistant Gloves are made with different configuration & materials to suit different applications
- The gloves can offer heat resistant ranging from 200°C to 1100°C, depending on the model selected. Models with Aluminized Back offers excellent heat reflection
