# PRODUCT INFORMATION

## SAFETY SHOE

### Toe Cap & Midsole

## Type of Safety Shoe Toe Cap

### Does steel toe cap protect your feet?

It protect your feet from being compressed by heavy object such as tools, wood and concrete. Steel toe cap boot also keep wearer safe from impact injury. It become one of importance basic requirement for a a safety shoes.

### Steel toe or a composite toe more preferable?

Both style of safety toe cap fulfill the safety requirement to provide maximize protection for wearer. Steel toe cap tend to more little heavier than composite toe cap which made by different material. It is optional based on customer personal preference to choose which design style they are seek.

### Steel Toe Cap

Steel toe cap is front cover area part of work boot toe box which made by steel or compound materials. The purpose is to protect wearer toe from injured or accidental compression during work. It designed to fulfill specific CE, SIRIM, ANSI/ASTM safety requirements for foot protection against compression and impact resistance.

### Composite Toe Cap

Composite toe cap also same as steel toe cap. The different is made by non-metallic and non-magnetic material. It comes in lighter weight to offer maximize comfortable for wearer without expend more energy when walk. It also same as stell toe cap compliance the safety requirements as well.
