SAFETY CUTTER
Pacific Handy Cutter is known as the leader and innovator in Safety Cutting Tools, but we got our start when we invented the original flat box cutter - the Handy Cutter.

In 1950, Herbert Lightburn recognized the market demand for a low cost cutting tool that could open shipping cartons more efficiently than a handheld razorblade. Lightburn developed and patented the instantly recognizable original Handy Cutter, which standardized the way grocery chains opened packaged goods and quickly emerged as the preferred cutting tool for stockroom operations and shipping departments across the country.

Since then, Pacific Handy Cutter has become the leading designer, manufacturer, and marketer of safety cutting tools for the store supply, industrial and retail markets. Our Safety Cutters are the preferred cutting tool among many businesses due to their ability to improve worker productivity while reducing the costs associated with accidental injuries, workers compensation claims, and damaged merchandise.

In addition to Safety Cutters, the company now designs and manufactures a breadth of safety components to round out a work safety system that has set the industry standard. PHC also produces a wide variety of utility knives, razor blades, and accessories offering the broadest assortment of cutters and complementary products in the industry.

Employee Safety & Your Business
Razor blade cuts can be very painful for your workers, but the harm to your business can also be significant. These injuries may result in large medical bills, lost days of productivity, and even costly lawsuits. According to OSHA, the average cost per claim for a laceration injury is $36,000.

Implementing the unique PHC safety system helps ensure employees have the proper tools needed to remain safe and productive. PHC products include guarded, spring back, auto-retractable and concealed blade cutters to provide safe options for workers, whatever the task at hand.

For our customers, using our safety cutters and safety system has resulted in significant reductions in cutter related injuries as well as a dramatic decrease in workers compensation claims.
For over 65 years Pacific Handy Cutter have been designing the safety products to improve worker safety and reduce damaged merchandise. With a relentless focus on innovation, PHC strives to create the best safety cutter for most applications. This PHC Safety System that designed is to help reducing painful injuries as well as increasing productivity and profits. PHC products include guarded, spring back, auto-retractable and concealed blade cutters to provide safe options for workers, whatever the task at hand. Using PHC Safety Cutters and Safety System has resulted in significant reductions in cutter related injuries as well as a dramatic decrease in workers compensation claims.

- Features convenient tape splitter to reduce any potential injuries
- Attach to CL36 Coil Lanyard for better retention
- Made in Taiwan
One of the biggest contributors to profit loss for retailers is damaged goods, which is often the result of the use of improper cutting tools. Eliminating the lost sales from razor blade damage can be a huge opportunity for increasing profitability. The PHC Blades are high quality steel and hold a very sharp edge that lasts longer than other brands. These are ideal for tough jobs and complement industrial line of PHC utility knives. Implementing the unique PHC safety system helps ensure employees have the proper tools needed to remain safe and productive.
**PACIFIC HANDY CUTTER Safety Point Blade Dispenser**

- The dispenser is made of durable plastic and contains 100 pieces SP017 Safety Point Blades
- Encouraged employees to properly dispose of loose blades and easily access new replacement blades
- Reduces employees injury by safely dispensing one blade at a time
- Attaches to front of PHC BB00205 Blade Bank to create a convenient blade change station
- Corresponding Cutters: PHC Safety Cutters including the S7, S8 and EZ4
- Made in USA

ABOUT US

When it comes to occupational safety & health, rest assured that you can count on Safetyware Group – an award winning integrated safety & health solutions provider with over 30 years of experience that provide one-stop OSH products & services. We manufacture safety shoes, safety apparels, rubber gloves, and signage & labels in our manufacturing facilities in Penang. With headquarters and 2 manufacturing plants in Penang, supported by 4 other regional offices in Kuala Lumpur, Melaka, Johor & Singapore, Safetyware is uniquely placed to deliver the superb customers’ experience that our customers have come to expect. We have also established collaborations with other renowned Personal Protective Equipment (PPE) manufacturers in Malaysia, USA, Taiwan, China, and India, to manufacture other range of PPE including safety helmet, safety glasses and goggles, ear muffs and ear plugs, particulate respirators and masks, fall protection products, sorbents and spill containment products, safety cabinets, traffic safety products, floor safety products, lockout & tagout (LOTO) products, amongst many others.

Apart from PPE manufacturing, we also partner with international PPE brands such as Sundstrom (Sweden), Ulitec (Taiwan), Elvex (USA), Honeywell (USA), GMI (UK), Delta Plus (France), Portwest (Ireland), and Harvik (Malaysia), to distribute their products in Malaysia and the region. Besides safety products, we provide EHS consultancy and safety training. Our Safetyware Academy offers both public and in-house training programmes catering a diverse range of industries. Safetyware is preferred and entrusted by more than 3,000 companies to be their OSH solution provider, because we don’t just sell products or services, we offer complete OSH solution.
