We've Something For You

HOW TO PROTECT YOURSELF AGAINST THE HAZE

Malaysia has been entertaining haze for a quite some time due to its proximity to Indonesia. This pollution definitely is unavoidable, however we could still protect ourselves from the haze and keep our bodies in the best condition despite the air quality. The haze effects basically depend on the condition of an individual and his immunity. Thus, below are some ways on how to protect yourselves from the haze.

Drink Plenty Of Water

Drink plenty of water will keep you hydrated throughout the day. One of the tips is to bring a bottle of water everywhere you go. This will increase your water intake and help your kidneys to flush away the unwanted toxins as much as possible.

Stay Indoors

Another way to protect yourself from the haze is to avoid from going outdoors especially when the PSI is above 100. Stay indoors as much as possible and only go out if necessary. You may also use air purifiers or air filters when you are at home.

Hydrate Your Eyes

Haze can cause our eyes to become dry and to the extent of allergic eyes to some others. In order to prevent things from getting worse, use preservative-free lubricating eye drops to moisturise and applying cold compress to the eyes can reduce the causes of dry and allergic eyes.

Protect Yourself From UV

Even though the weather is hazy outside, the UV rays can still shine and get through of it. Thus, it is crucial for us to put on a broad-spectrum sunscreen on our skin in order to prevent premature skin ageing. Sun-protective tools like hats and umbrellas too are highly recommended to be used to protect yourself against the haze.

Wear A Mask

The most suitable mask to be wearing during haze is a respiratory mask such as the N95 mask. This type of mask can filter out the airborne particles from the air and as a result, producing better and cleaner air for the wearers. Having said that, surgical masks or paper masks do not offer any protection against the solid particles present in the air.

Stop Smoking

Quit or avoid smoking because there is already too much pollution in the air due to the haze. Also, smoking during this period of time will make your lungs become more sensitive to the effects of air pollutants. Smoking can lead to respiratory infections and is injurious to health as overall.

Consume Fresh Fruits And Vegetables

Eat plenty of fresh fruits and vegetables during hazy weather. These foods will improve your immunity and strengthen your lungs. It is advisable for you to consume plenty of fruits and vegetables during this period of time since your body needs elements to boost up the immunity to prevent from getting any sickness or unwanted injuries due to the haze.

Wash Your Hands And Face

Don't forget to wash your hands and face once you are at home. This is to prevent and minimize any infections that you could bring from outside to your home, for example, you are bound to bring particles on your skin and tend to add to the pollution levels at your home.

MAKE YOUR HOME SAFE FROM FIRE

Are you fire safe in the home? In ensuring safety from fire hazards at home, it is essential for all people in the house to know and be aware of the tips of fire prevention at home. This is due to the fact that when it comes to household fires, they start at home with you. Followings are the tips on how to make your home safe from fire.

Excessive Sockets

Putting too much plugs on one socket could lead to overheating. Try to use one plug per socket to avoid any technical malfunctions that could lead to fire hazards. Old and poorly wired electrical appliances can also be dangerous if no precautions taken prior to its condition and usage.

Kitchen Safety

There are many things that are going on whilst cooking that could lead to a fire. In ensuring on how to cook safely, kindly make sure that you are not easily distracted when something unexpected happen while cooking. Another concern is take care if you are wearing loose shirt or blouse as it catches fire easily quite easily. In keeping the kitchen safe, you might also want to take pans off the heat when you are away, abstain from cooking when taking alcohol or prescription and check that the hot cooker is clean and off after you have finished cooking.

Adequate Fire Prevention Equipment

Fire prevention equipment such as fire extinguisher, home escape ladder and smoke detector are essential to be kept at home. Fire extinguisher for example, is one of the common fire prevention tools that should be mandatory in all houses. Comes in numerous sizes and weights, having this item at home is crucial especially when dealing with unexpected fire hazards. However, having a fire extinguisher at home is not a real solution if no one knows how to use it. Thus, it is important for all people in the house knows where the extinguisher is positioned and how to use it when necessary. Another fire prevention equipment that should have at home is home escape ladder. Let's say if your house has a basement or more than just a single story, you will need a fire escape ladder at home.

Candles And Decorative Lights

Things like candles and decorative lights also need to be taken care at home. In ensuring safety, do make sure that the candles are held firmly upright by the holder so they won't fall over, do not put the candles near curtains or other fabrics and keep them out of reach from children. As for the decorative lights, do not leave the lights on when you are away or go to bed and replace the bulbs that blow. Since candles and decorative lights are tend to be used during celebrations and holidays, extra precautions is needed if you have friends or family staying at your home.

These practices are essential to be practiced at home in ensuring the safety from any fire hazards. Having fire prevention equipment is not a solution unless everyone in the house knows how to use it prior to any unexpected fire hazards.

CHEMICAL AND HEAVY METAL TESTING

Heavy metals such as mercury, arsenic, lead, cadmium, tin and antimony are toxic metals and harmful to all living organism. Accumulation of such elements over time can cause serious illness or fatality. To ensure it's safe, we apply AOAC method to determine heavy metal residue in food.

HALAL & GMO TESTING

Halal by Islamic law means allowed or permitted objects or actions under Shariah law. Commonly use of Halal certification is on meat products, food contact materials and pharmaceuticals, clothing, business, human relationship & etc. The GC, PCR method is being use to test for Chemicals, Alcohol Content, Foreign DNA, Porcine and other contaminants.

NUTRITION FACT TESTING

The nutrition facts label also known as the nutrition information panel is a label required on most packaged food and drink in most countries. Predominantly the core nutrition facts are Protein, Total Fat, Carbohydrate and Energy. Our testing services for nutrition facts and labelling meets all FDA/USDA, EU Directive 90/496/EEC, Australia, New Zealand, Singapore, Hong Kong, Taiwan, Malaysia, Middle East and other statutory requirements.

PRESERVATIVES & PESTICIDES TESTING

Preservatives are synthetic or natural substances which are added into products during production process to prevent decomposition of food products. We provide an accredited testing service to examine preservative and pesticide levels for both consumer and industrial products.

FOOD PACKAGING MATERIALS TESTING

Food packaging materials is the materials used in packaging for food. It is designed to provide physical protection on the food, for instance barrier protection etc. as well as information transmission. The following testing as required under the Malaysia Food Act 13th Schedule, Regulation 28 is for Arsenic, Cadmium, Antimony, Lead. And as required under Regulation EC/1935/2004 : Material contact with food is for 4-methylbenzophenone, Bisphenol A, Pentachlorophenol, Arsenic, chromium, Lead, Copper.

HEALTH CERT & FREE SALES

Different product require different test parameters. Commonly required will be microbiological, preservative, and heavy metal tests. Microbiological test such as Total Bacteria Count, Mold & Yeast Count, Coliform, and other pathogenic bacteria are the core parameters. Also heavy metal such as Mercury, Lead, Cadmium, Arsenic and preservatives such as Benzoic Acid are also commonly required for Health Certificate Application and Free Sales Application

PHARMACEUTICAL & TRADITIONAL

HERBS TESTING

Pharmaceutical products especially Antibiotics are commonly tested because it is a substance to kill or inhibit the growth of a specific bacteria. Antibiotic is widely used in human and animal such as livestock to prevent the infection of bacteria or viruses. The USP, BP, LC methods are used for pharmaceutical testing. Where herbs are used for its medicinal value, Testing is conducted on it's parts such as leaves, roots, flower, seeds, resins, root bark, inner bark, berries or other portions of the plant. The USP, BP methods are applied for Herb Testings.

EDIBLE OIL TESTING

Overheating or recycling oil can be harmful due to oil deterioration, polymerization, oxidation etc. We are licensed to test edible oil and petrochemical products under the Malaysia Palm Oil (MPOB) & Federation of Oils, Seeds and Fats Associations (FOSFA). We cover accredited tests such as FFA, M&I, IV and DOBI, as these core parameters are often required by the industry. We are committed to provide same day delivery (SDD) and accurate results to meet your surveyor and customer's shipping schedule.

SMEs – The Way 4WRD with Digital Transformation

Well Kam
Founder of VA Group
Northern Region Chairman, SAMENTA

The New Industrial Revolution Wave

So much has been said and stressed regarding Industrial Revolution 4.0 (I.R. 4.0). In Malaysia, the government coined it as a National Project, Industry 4WRD, which was launch on October 31, 2018.

A Reality Check

By definition, even the larger companies are also nowhere near IR 4.0. What about Small and Medium Enterprises (SMEs)? It doesn't matter where we are exactly. It matters that we know that we can make better use of technologies and tools to our advantage, towards Industry 4WRD.

How to start for SMEs?

Start with the Right Mindset:

Turning Disruptive Technologies into Constructive Technologies and Strategies. Under Industry 4WRD, various Government agencies are focusing on helping industries, especially SMEs to move towards IR 4.0.

For example, SME Corp's Vision is by 2024, 100% of SMEs embrace Digitalization. Currently, the statistics stands at 32%, i.e. even simple digitalization like the Point-of-

Sales system or using digital marketing approach instead of the traditional physical flyers distribution.

The Ministry of International Trade and Industry (MITI) started Industry 4WRD Readiness Assessment (RA) to help industries to be ready for IR 4.0. This is especially for the Manufacturing and its related services sector. The objective of the RA is to identify areas of improvement in terms of People, Process and Technology.

Have you applied for RA, if you are within the eligible sector?

The Way Forward for Enterprising & Growing SMEs and beyond...

The key to IR 4.0 is better and faster connectivity with the Internet of Thing (IoT).

VA Partners, together with its counterpart from Xiamen, China, have developed a business-transforming approach for Business Process Optimization and Digitalization, termed LEAN ERP. In practical terms, Lean Management concept is applied to optimize the business processes and then integrated and digitalized as an ERP system using a cloud-based platform called Jian Dao Yun (JDY).

The Value Proposition is being flexible and integrated, with the following specific benefits:

1. Optimizing & standardizing Business Process and improving Management Efficiency.
2. Promote teamwork and reduce communication barriers.
3. Enable Data Tracking and Data Analysis promptly.

Let's move forward by consolidating the core and trigger progress with process optimization and digital transformation.

PRODUCT HIGHLIGHT

RETRACTABLE TOOL LANYARD

SAFETYWARE RETRACTABLE TOOL LANYARD WITH ALUMINIUM CARABINER

ITEM CODE: TLY290

- This lanyard is a solution to prevent tools from falling in order to avoid the risk of dropped tools to hurt people, causing damage and disrupting work
- Come with single-action (self closing) Aluminium Carabiner
- Reflective accent for higher visibility
- Increase safety & productivity
- Applications: Drilling Derricks, Wind Turbines, Cranes, Buildings, Scaffolds, Bridges, Telecom Masts

Material	Polypropylene (PP) & Nylon
Length	90cm
Color	Green
Max.Working Capacity	20 lbs / 9.2 kg
Weight	65g
Packaging	1 each/ bag, 200 bags/ carton

PRODUCT HIGHLIGHT

CUT RESISTANT GLOVES

TenActiv™ CUT-RESISTANT ANTI-IMPACT GLOVE MADE WITH MICROPORE NITRILE GRIP

ITEM CODE: **STACXPNVB**

- Sizes available: 7 - 11
- Blend of TenActiv™ HPPE and steel for stellar cut resistance
- ANSI level A7 cut protection
- High-visibility neon green TPR backing extends right to the fingertips to provide impressive impact protection
- Micropore nitrile coating provides excellent grip by displacing oil
- Featuring a customizable ID label
- Applications: Oil & Gas, Metal Fabrication, Metal Stamping, Industrial Pipe Fitting, Construction

TenActiv™ GREEN 13-GAUGE EXTREME-CUT GLOVE WITH POLYURETHANE GRIP

ITEM CODE: **STAGCXPU**

- Sizes available: 5 - 12
- Features high performance fibers including aramid, steel, composite filament fiber and TenActiv™ yarn for extreme cut resistance
- Polyurethane coating gives a bare-hand feel
- Green color hides dirt extending lifespan
- Fully launderable
- Impressive dexterity for such a high cut-resistant glove
- Applications: Automotive Assembly, Metal Fabrication, Metal Handling, Metal Stamping, Recycling Plant/Sorting

TenActiv™ COMPOSITE FILAMENT FIBER CUT-RESISTANT KNIT WITH GREY PU PALMS

ITEM CODE: **STAFGPU**

- Sizes available: 5 - 12
- TenActiv™ yarn has a cool feel against the skin for exceptional comfort
- Grey polyurethane palm is non-shedding – ideal for applications where contamination is a concern
- 13-gauge knit is comfortable and dexterous
- Polyurethane is the preferred coating for high tactile feel
- TenActiv™ is knit with composite-filament fiber for good cut resistance
- Applications: Construction, Aerospace Industry, Automotive Industry, Glass Plants, Handling Sharp Objects, Metal Fabrication, Metal stamping

PORTWEST HAND WIPES

Safetyware
SAFETYWARE GROUP
Responsibility & Care

PORTWEST IW10 Hand Wipes

ITEM CODE: IW10WHR

- Material: Polypropylene
- Dimension: 266mm x 264mm
- 150 wipes
- Removes wet paint, oil, grease, grime etc
- For use on hands, tools and surfaces
- Antibacterial action - effective against E - coli, Salmonella, MRSA, Listeria and Weils Disease
- Dermatologically tested
- Alcohol Content
- Orange Fragrance
- Standard: EN 12054, EN 1276

PORTWEST IW30 Heavy Duty Hand Wipes

ITEM CODE: IW30ORR

- Material: Meltblown Textured Fabric
- Dimension: 266mm x 215mm
- 50 wipes
- Heavy duty wipe to quickly and effectively remove oil, grease, grime and wet paint
- The textured material is designed to remove ingrained dirt
- Antibacterial action and dermatologically tested
- Alcohol Content
- Orange Fragrance
- Standard: EN 12054, EN 1276

PORTWEST IW40 Hand Sanitiser Wipes

ITEM CODE: IW40BLU

- Material: Polyviscose
- Dimension: 195mm x 200mm
- 200 wipes
- Hand sanitising wipe with antibacterial and antifungal action - effective against 99.9% of bacteria including Human Influenza H1N1 and H3N2
- Alcohol Content
- Fragrance Free
- Standard: EN 12054, EN 14476

PORTWEST IW50 Surface Sanitiser Wipes

ITEM CODE: IW50BLU

- Material: Polyviscose
- Dimension: 195mm x 200mm
- 200 wipes
- Antibacterial surface wipes designed to protect surfaces and prevent contamination
- Ideal for sanitising surfaces prior to food preparation
- Alcohol Content
- Fragrance Free
- Standard: EN 1276, EN 1650, EN 13697, EN 13704

FIRE FIGHTING & FIRE DRILL

Often accidents happen due to ignorance or the lack of knowledge in prevention measures. Employers can do more than express regret by ensuring that accidents would not happen again in the future.

[TRAINING OBJECTIVES]

Upon course completion, participants will be able to:

- * Understand and able to explain basic requirements of Fire Service Act
- * Determine, identify and demonstrate the technique of operating the various fire extinguisher and fire fighting equipment.
- * Describe the various type of fire fighting equipment.
- * Select, operate and deploy fire fighting equipment complete with hose handling technique.
- * Increase in fire prevention awareness in the work station.
- * Team building element

[COURSE CONTENTS]

- * Introduction fire service act & UBBL
- * Fire chemistry & classification of fire
- * Fire extinguisher theory & practical (type, standard, approaching technique)
- * Passive & active system
- * Emergency response plan
- * Fire video
- * Fire fighting equipment
- * Hose handling technique (theory & practical)
- * Kawad kebomgaan / Fire fighting technique (H1, H2 & Attacking team technique) - practical

[WHO SHOULD ATTEND]

Managers, supervisors, safety and health officer, security personnel, emergency response team members, safety committee member and all employees.

Training Consultant - Mr Ramu

Mr Ramu is a Fire Officer attached to Sungai Petani Fire Station has been in the service more than 22 and also obtained Bachelor of Human Resource Management. Mr Ramu has undergone various professional courses that included Fire and Rescue Training, Breathing Apparaters, CPR Hospital Sungai Petani, Offensive Indoor Fire Fighting, Trainer for ERT /ERP since 1992 and a Motivational Speaker

Make Safety Happens

EFFECTIVE SAFETY & HEALTH COMMITTEE TRAINING

A well-trained safety committee is a very valuable tool to help management provide a safe workplace for employees and improve the bottom line of any company, large or small. The purpose of the safety committee is to assist management in providing a safe workplace. The committee members, being active safety advocates, accomplish this. Acting as the liaison between workers and management, committee members work to ensure a cooperative effort to improve safety in the workplace. A safety committee should be comprised of managers, supervisors, workers and union representatives. This committee should reflect a diverse cross-section of the work force. Employee participation is very important to this committee. Volunteers, rather than appointees, are more likely to be active and interested in fulfilling the mission of the safety committee.

[TRAINING OBJECTIVES]

At the end of the course, participants will be able to:

- * Function effectively as a member of their Health & Safety Committee
- * Contribute to OSH legal compliance
- * Contribute to minimizing health and safety risks in their workplace.

[COURSE CONTENTS]

- * OSH Policy and Objectives
- * Effective OSH Committee Meeting
- * OSH Committee Meeting Legal Requirements
- * Committee function
- * Meeting input and output
- * Occupational Safety and Health Act and Regulations
- * Factories and Machinery Act & Regulations
- * Hazard Identification, Risk Assessment and Risk Control
- * What is Hazard and Risk
- * Incident Prevention, Reporting and Investigation
- * Emergency Preparedness and Prevention

[WHO SHOULD ATTEND]

- * Safety, health and environment personnel/practitioner
- * Safety and health officer
- * Safety and health committee member

[COURSE CONTENTS]

- * Audit and Inspection Skills
- * Audit and Inspection Checklist
- * Audit and Inspection Reporting
- * Workplace HIRARC Discussion

Training Consultant -

Ms Lily Ismail

Certified OSH Trainer with TTT certification. Expertise in handling major corporate project with top management, thought leaders and key decision makers at all level at matrix organization. Solid background in safety training & development, process improvement and programme implementation. Conduct safety walk-through / meeting with client to identify potential workplace hazards and developing effective mitigation controls. Setting up PPE Matrix with comprehensive assessment report.

WIN LAZADA VOUCHERS WORTH RM20.00 x 4

SAFETY QUIZ

1. Which of the following mask is most suitable for haze protection?

- a. Surgical mask
- b. Paper mask
- c. N95 mask
- d. Nylon

2. Which of the following are the way to protect yourself against the haze?

- I. Stay Indoors
- II. Stay Outdoors
- III. Wear a Mask
- IV. Drink Plenty of Water

- a. II & III only
- b. I, II & III only
- c. II, III & IV only
- d. All of the above

3. How to make your home safe from fire?

4. What is the Fire Prevention Equipment?

- I. Fire Extinguisher
- II. Particulate Respirator
- III. Home Escape Ladder
- IV. Heat Resistant Glove

- a. I & IV only
- b. I & II only
- c. III & IV only
- d. I & III only

5. Advantage of consume fresh fruits and vegetables :

6. Putting too much plugs on one socket could lead to fire hazards.

- a. Correct
- b. False

MINI GAME Find The Difference

Terms and Conditions:

I) Limited 4 Lazada Voucher (only applicable for Safetyware store) RM20 only per winner. First come first serve.

II) The participant require to provide us a valid Company Name, IC Number, Contact Number, Address and Correct Answer by sending email to marketing@safetyware.com.my

III) Prizes are not exchangeable or redeemable from SAFETYWARE for cash. Prize winners will be given a period of 7 working days to respond to this or any email communication and claim their prize. If the prize winner does not respond within this period, an alternate winner will be selected from the entriypool by random selection. SAFETYWARE reserve the right to change these proceedings without notice.

IV) The Safety Quiz & Mini Games ends on 20 December 2019. The winners will be personally notified.

V) All and any questions or disputers will be subjects to the exclusive jurisdiction of the SAFETYWARE Management.

QUIZ & MINI GAME
