

## POWER ASSISTED FILTER PROTECTION

Sundström Safety's powered fan units are designed to give the user the maximum level of protection, comfort, simplicity & cost-effectiveness

### POWERED AIR-PURIFYING RESPIRATOR | SR 500

The SR 500 PAPR system functions as alternative to Air Purifying Respirators (APR) while most often offering a much higher Assigned Protection Factor (APF) for the safety of the worker. The filtered air, with its consistent positive air flow, provides a comfortable and reliable respirator that can be used in normal conditions as well as conditions that are strenuous, warm or of long duration. The above-atmospheric pressure generated prevents surrounding pollutants from penetrating into the breathing zone.

### LOOSE FITTING HOOD | SR 530

A lightweight hood which covers the face, head, neck and shoulders. Easily adjustable headband suspension and neck seal- providing high protection including for people with beards. One size fits all face shapes and sizes. Visor of chemicalresistant CA. Delivered with a PUR (Polyurethane) breathing hose. Provides respiratory protection with an at APF of 1,000 (Assigned Protection Factor) documented in third party studies, according to OSHA 3352-02 2009.
