

PRODUCT SPECIFICATION

SAFETYWARE Cylinder Tank Lockout

- Glossy surface with advanced injection molding.
- Has a concentric structure to lockout which can solve the problem of different screw thread diameters.
- It features three lock holes, which allows multiple people to lock it at the same time.
- Quick and convenient installation.
- Ideal alternative to prevent all accidental gas leakage.
- Prevents access to the main cylinder valve.
- Suitable for neck ring with maximum diameter less than 80 mm.
- Can be locked with 3 padlocks with lock shackle diameter less than 7 mm.
- Sticker can be attached to the body and written on with a pen.

APPLICATIONS

- LOTO
- Industrial
- Maintenance
